

DAX Measures

1.Total Students:

Total Students =
COUNTROWS('student-por')

2.Average Age:

Average Age =
AVERAGE('student-por'[age])

3.Average Final Grade:

Average Final Grade =
AVERAGE('student-por'[G3])

4.Average Absences:

Average Absences =
AVERAGE('student-por'[absences])

5.Pass Percentage:

Pass % =
DIVIDE(
 CALCULATE(
 COUNTROWS('student-por'),
 'student-por'[Result] = "Pass"
),
 COUNTROWS('student-por')
)

6.Average Study Time (Hours):

Avg Study Hours =
AVERAGE('student-por'[studytime])

7.Students with Internet Access:

Students with Internet =
CALCULATE(
 COUNTROWS('student-por'),
 'student-por'[internet] = "yes"
)

8.Students Wanting Higher Education:

Higher Education Aspirants =
CALCULATE(
 COUNTROWS('student-por'),

```
'student-por'[higher] = "yes"  
)
```

9.Average Number of Failures:

Average Failures =

```
AVERAGE('student-por'[failures])
```

10.Pass Count:

Pass Count =

```
CALCULATE(  
    COUNTROWS('student-por'),  
    'student-por'[Result] = "Pass"  
)
```
